## Предисловие

Разноуровневый тест — это метод диагностики обученности школьников, позволяющий оценить уровень усвоения учебного материала.

Данное пособие содержит разноуровневые тесты по английскому языку для учащихся 5 классов. Материалы тестов охватывают все лексические и грамматические темы, изучаемые на данном этапе обучения. Последовательность ввода грамматических структур и лексических единиц соответствует учебной программе по английскому языку.

Задания в тестах расположены по степени возрастания уровня их сложности. Каждое задание оценивается в соответствии с уровнем сложности. Максимальная оценка за каждый тест — 30 баллов.

Уровень сложности	Количество заданий	Баллы за одно задание	Максимальное количество баллов за задание
I	4	0,5	2
II	4	1	4
III	4	1,5	6
IV	4	2	8
V	4	2,5	10
